

From High Risk Pregnancy to Happy Family: An Inspiring Account of Twin Twin Transfusion Syndrome

:

Navigating the challenges of a high-risk pregnancy is an arduous journey that demands immense courage and resilience. For parents expecting twins, the stakes are even higher, as certain complications can pose life-threatening risks to both children. Twin twin transfusion syndrome (TTTS) is one such rare but severe condition that can occur when monozygotic twins share a placenta and develop an uneven distribution of blood flow. This can lead to serious health problems for both twins if not treated promptly and appropriately.
